Ahoy Matey!

We are offering an exciting program that is sure to completely engage your students while learning important Science, Language Arts and Social Studies Sunshine State Standards.

*Our in-school field trip is called the **Marine Archaeology Exploration Program (MAEP)**. During this program, your students **become Marine Archaeologists** and discover the excitement of Florida History and the Science of Archaeology while researching **real artifacts** found in Broward County!*

***Climb aboard** and make way for the 1.5 hour experiential simulated field expedition on which your Marine Archaeologists take a journey through the **Scientific Method** utilizing **hands-on activities** including metal detecting, coin probing, dendrochronology and scientific experimentation to **develop hypotheses** and put together the pieces of the past through critical thinking and problem-solving.*

We can perform up to 3 programs per day to ensure everyone in your grade has an opportunity to participate.

Please call us at (954) 781-5321, or e-mail at vonereseach@bellsouth.net.
